These studies will involve measurements of the rates of nitrogen assimilation, nitrification and denitrification in various aquatic environments. The measurements involve addition of tracer and subsequent analysis of the C or N isotopic content of various nitrogen and carbon compounds in seawater. The instrument will also be used in support of graduate research in oceanography.

Application Accepted by Commissioner of Customs: May 8, 1995.

SUPPLEMENTARY INFORMATION: The purpose of these meetings is to take a comprehensive look at the groundfish fishery, goals and objectives of the fishery management plan, and problems identified by the industry, other interested public, and management agencies. The Council is referring to this as a "scoping session" to identify issues that may or may not lead to preparation of a Federal environmental impact statement. The Council believes the public process of problem identification, open discussion, and consideration of alternative solutions is appropriate for this review of the groundfish management program.

The format of these meetings will be a departure from the typical Council meeting format.

June 26, 1995

The Council will convene at 1:30 p.m., to address some non-groundfish issues.

June 27, 1995
